Innovative Space Solutions

Innovative Space Management Solutions (ISMS) is the trusted partner for commercial, industrial, and institutional organizations that demand more from their space. We help you do more with what you have—unlocking capacity, improving flow, and creating safer, more efficient environments.

ISMS specializes in the design, manufacturing, and installation of high-performance modular buildings, access and storage systems, and material handling solutions. Each is engineered to solve real-world operational and storage challenges, from complex space constraints to straightforward capacity expansions.

Whether you need to reclaim wasted space, improve accessibility, or support future growth, ISMS delivers systems that maximize efficiency, streamline operations, and adapt as your needs evolve. Our solutions are built with flexibility in mind - so your space works today and continues to work tomorrow.

Backed by expert engineering, proven manufact-uring capabilities, and seamless installation, ISMS solutions are built to perform - reliably, safely, and cost-effectively. From initial concept through final installation, we bring clarity, precision, and accountability to every project.

For dependable results, responsive service, and solutions tailored to your space, your operation, and your budget, ISMS delivers the right solution—right now.

Modular Buildings

Innovative Space Solutions

Innovative Space Management Solutions (ISMS) delivers smart, modular space solutions designed to maximize flexibility, speed, and value. From design and manufacturing to installation, ISMS provides high-performance modular buildings tailored to your facility's needs.

Features

- Reusable, relocatable, and expandable modular systems.
- Fast installation with minimal operational disruption.
- Load-bearing storage roof and multi-story options.
- Durable construction for industrial and military environments.
- Wide selection of colors and finishes.
- Typically 25–30% more cost-effective than conventional construction.

Applications

- Clean Rooms
- Control Rooms
- Climate-Controlled Buildings
- Curtain Walls
- Guard Houses
- HazMat Storage
- In-Plant & Multi-Story Buildings
- Panelized Systems
- Partition Walls
- Portable & Shipping Offices
- Storage Buildings
- Vestibules
- and more...

Mezzanines

Innovative Mezzanine Solutions

ISMS modular mezzanines expand usable space without the cost or disruption of traditional construction. By maximizing vertical space, we turn unused height into productive square footage - adding storage, work platforms, and office space without increasing your footprint. With near-unlimited configuration options, ISMS mezzanines deliver flexible, safe, and high-performance solutions built for today and ready for tomorrow.

Features & Benefits

Customizable Designs -Tailored to your facility, workflow, and operational requirements for maximum efficiency.

Fast, Low-Disruption Installation -Bolt-together systems allow rapid installation with minimal interruption to ongoing operations.

Durable & Code-Compliant - Engineered to meet or exceed IBC and OSHA standards and delivering long-term performance and safety.

Cost-Effective Space Expansion - Gain valuable floor space at a fraction of the cost of new construction or building expansion.

Expandable for Future Growth - Modular designs make it easy to reconfigure or expand as your business evolves.

Integrated Office & Observation Areas - Add enclosed offices, breakrooms, or observation platforms to maximize productivity and oversight.

Safety Gates for Material Handling - Choose from swing, lift-out, sliding, or pivot gates designed for safe, efficient loading and access.

Guardrails & Handrails - Built-in safety systems ensure compliance while protecting your team and operations.

Ballistic-Rated Buildings

ISMS ballistic-rated buildings are purpose-built for maximum protection, long-term durability, and reliable performance in high-risk environments. Each structure features welded steel frames, certified ballistic wall panels, bullet-resistant windows, and reinforced entry systems engineered to withstand real-world threats while supporting efficient operations.

Every building is custom-designed to meet your layout, threat level, and security requirements, delivering uncompromising safety without sacrificing usability, comfort, or appearance. Available in permanent or mobile, rapid-deployment configurations, ISMS offers flexible designs, multiple ballistic protection levels, and a range of finishes to integrate seamlessly with your facility and mission.

Trusted across government, law enforcement, military, transportation, and critical infrastructure sectors, ISMS ballistic-rated buildings perform where security cannot be compromised.

Applications

- Secured guard shacks and access control points.
- Ballistic-rated guard booths.
- Police, emergency, and tactical command centers.
- Forward operating command centers.
- Perimeter observation and monitoring posts.
- Rapid-deployment and mobile security shelters.
- Security screening stations and ballistic entry vestibules.
- Border security checkpoints and inspection facilities.
- Airport, TSA, and aviation security stations.
- Data center and critical infrastructure security enclosures.
- Stadium, event, and VIP protection posts.
- Corporate campus security facilities.
- And more...

Safety & Protection Barriers

ISMS is a leading provider of safety barrier products and solutions engineered to protect people, equipment, and facilities. We partner with industry-leading barrier manufacturers to design and install high-performance industrial protection systems for environments where vehicles, materials, and pedestrians intersect. Our team works closely with clients to assess risk, define protection strategies, and deliver solutions tailored to each facility's operations.

Our safety barriers are purpose-built for commercial and industrial environments and professionally engineered, fabricated, and installed to withstand severe impacts. These systems help improve traffic flow, reduce damage, enhance operational efficiency, and safeguard critical infrastructure across distribution centers, warehouses, and manufacturing plants. From initial planning through installation, ISMS delivers reliable protection solutions that support safer, more productive facilities.

Solutions

- Rack Protection
- Bollards
- Ground-Level Protection
- Traffic Barriers
- Pedestrian Barriers
- Safety Rails
- Gate Protection
- Door Protection
- Loading Bay Protection
- Column & Corner Protection
- Wall Protection
- And more...

Security Cages

ISMS delivers secure, cost-effective wire cage solutions that control access to distribution centers, buildings, work cells, and factory floors. Our custom security cages are designed for a wide range of secure spaces and partitioning needs, helping facilities protect assets, manage access, and maintain safe, organized operations.

These systems support traditional and specialized applications, including tool cribs, secured storage areas, maintenance cages, machine guarding, robotic work cell barriers, pallet rack backing, vertical lift enclosures, and DEA-compliant security enclosures. ISMS security cages are available in a variety of sizes, configurations, and finishes, making them suitable for both temporary and permanent security applications. From design through installation, we deliver solutions built to meet the demands of modern industrial environments.

Features

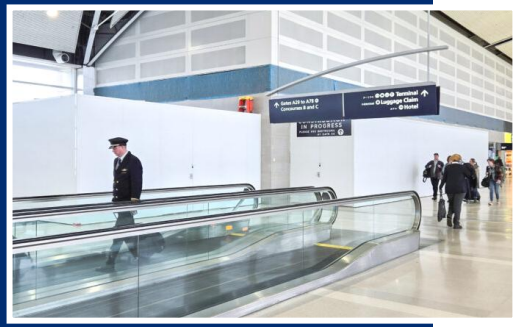

- Heavy-duty steel doors with tamper-resistant hinges.
- Keyed, electronic, or card-reader access control.
- Compatibility with alarm systems.
- Designed to prevent climb-over and overhead access.
- Service window for secure transfer of materials.
- Coded push-button and remote controlled entry lock.
- Steel support posts, spaced up to 10 feet apart.
- Welded base plates for secure floor anchoring.
- Anti-cut, anti-pry, and high-security configurations.
- Powder-coated and galvanized finishes for durability and corrosion resistance.
- Custom sizes, layouts, for integration with new and existing facilities.

Temporary Walls

ISMS provides industry-leading temporary and relocatable wall systems designed to control dust, noise, and work zone safety during construction, renovations, and daily operations. Our solutions create effective barriers that protect occupants, staff, and work crews while keeping facilities clean and secure.

We offer new and reusable systems for purchase or lease, ideal for commercial and industrial environments.

Modular and easy to install, they adapt to changing jobsite conditions and outperform traditional plastic and drywall methods. From short-term projects to long-term facility needs, ISMS delivers flexible, professional containment solutions that enhance safety, efficiency, and uninterrupted operations.

Features

- Fast installation: Installs up to five times faster than drywall, getting projects moving sooner.
- Reusable and eco-friendly: Panels can be reused 15+ times and are 100% recyclable.
- Professional look: Smooth, and fabric finished surfaces that can include graphics, logos, or branding.
- Safety: Forms a strong barrier to protect people and work areas, with optional fire-rated finishes.
- Flexible design: Adjusts to different layouts and ceiling heights.
- Low disruption: Minimal noise, dust, and downtime.
- Sustainable: Supports greener practices and can contribute to LEED points.
- Durable: Built to withstand repeated use and harsh jobsite conditions.
- Modular: Panels can be added, removed, or reconfigured as project needs change.
- Sound control: Reduces noise between work areas.
- Dust containment: Keeps work zones cleaner and minimizes dust spread.
- Customizable: Sizes, colors, and finishes can be tailored to project requirements.

Racking

ISMS offers high-performance racking systems designed to efficiently store standard and oversized inventory. Our solutions create organized, accessible, and space-optimized storage for industrial, manufacturing, and distribution operations.

Maximizing vertical space, ISMS racks increase storage capacity while supporting safe, efficient workflows.

Available in single- or double-sided configurations with a range of load capacities and sizes, each system is tailored to your operational needs.

ISMS transform underutilized floor space into structured, scalable, and safer storage that enhances organization, productivity, and material protection.

Benefits

- Accommodates uniform and non-uniform products and materials with ease.
- Increases storage density and handling efficiency for long or bulky items.
- Frees valuable floor space by elevating inventory off the ground.
- Protects materials from damage while improving visibility and organization.
- Optional deck supports and wood decking create flat-surface storage.
- Improves workflow and access by organizing materials for quick retrieval.
- Supports flexible layouts to adapt to changing inventory or operational needs.
- Reduces labor and handling time by keeping items properly stored and accessible.
- Enhances workplace safety by minimizing clutter and trip hazards.
- Built for durability to withstand heavy loads and long-term industrial use.
- Easily integrates with material handling equipment for streamlined operations.
- Optimizes space, protects inventory, and improves operational efficiency.

Material and Rider Lifts

ISMS delivers engineered material and rider lift systems that improve safety, efficiency, and workflow in industrial and commercial environments.

Our systems are designed to move a wide range of materials, from palletized goods to tools and supplies, from ground level to mezzanines, upper storage, or elevated work areas.

With a compact footprint, ISMS solutions integrate easily into existing warehouses, manufacturing plants, and distribution facilities, helping clients maximize vertical space without major structural changes or operational disruption.

We specialize in custom-designed and professionally installed systems that prioritize rider safety, ease of use, and long-term reliability. Compared to forklifts or manual handling, ISMS lifts reduce injury risk and product damage while improving efficiency. They also offer a more cost-effective alternative to freight elevators, with lower installation and maintenance costs.

From design through installation and support, ISMS provides practical solutions that streamline material flow, enhance safety, and optimize facility performance.

Applications

- Manufacturing
- Warehouse
- Distribution
- Transportation
- Self Storage
- And more...

Installation

ISMS is a trusted specialist in the professional installation of commercial and industrial space management solutions, delivering precision, efficiency, and reliability on every project.

From in-plant offices and mezzanines to workspace partition walls, modular cubicles, and facility signage, ISMS installs a comprehensive range of solutions designed to maximize space, improve workflow, and support operational efficiency, safety, functionality, and long-term performance in any environment.

Our team works with you from initial design through final installation and provides ongoing support, ensuring each project is executed to the highest standards.

By combining industry expertise with a commitment to quality, ISMS delivers cost-effective installation solutions that streamline operations and create organized, high-performing environments built to adapt and grow with your operations.

Benefits

Expert Installation - Accurate, professional installs done right the first time.

Enhanced Safety - Systems installed to improve safety and meet standards.

Faster Turnaround - Efficient execution minimizes downtime.

Better Space Use - Maximizes layout, flow, and productivity.

Long-Term Value - Reliable performance with lower maintenance costs.

Locker Installation

Precision Locker Installation. Nationwide Reliability.

ISMS is a trusted nationwide locker installation specialist known for precision, communication, and dependable execution. From the initial site visit to the final punch list, we coordinate every detail to deliver turnkey locker solutions that are on time, on spec, and stress-free.

We work seamlessly with locker manufacturers, distributors, general contractors, facility managers, and owners to install a wide range of locker systems designed to maximize space, improve workflow, and support long-term performance.

From design coordination through final installation, ISMS provides the expertise and support needed to create organized, efficient, and high-performing environments built to grow with your operations.

Benefits

Expert Installation – Accurate, professional installations completed right the first time.

Nationwide Service Coverage – Consistent installation quality and project coordination across multiple locations nationwide.

Turnkey Service – From site coordination to final punch list completion, ISMS manages every detail.

Scalable Solutions – Installation services designed to support projects of any size, from single facilities to multi-site rollouts.

Dependable – Responsive support and attention to detail from start to finish.

Vehicle Storage

ISMS delivers distinctive storage facility solutions for automobiles and recreational vehicle storage - designed for clients who demand high performance storage.

Our integrated services combine industry-leading infrastructure with refined, showroom-quality design to safeguard and showcase high-value assets.

From concept through completion, every detail is engineered for durability, efficiency, and long-term value, supported by climate control, intelligent layouts, and quality materials.

We also offer premium flooring, precision lighting and client tailored interior finishes elevate each facility into a curated environment that reflects the value of the collections within.

The result is a high-performance facility built to protect, optimize, and showcase what matters most.

Services

- Interior build-outs and space enhancements.
- Renovation, repair, and storage space modernization.
- Maintenance programs for long-term reliability.
- Custom mezzanine design and installation.
- Advanced vehicle lift systems for high-value assets.
- Electrical, HVAC, and climate control systems.
- Lighting planning and installation.
- Storage space planning and optimization.
- High-performance epoxy flooring systems.
- Custom flooring for durability with upscale aesthetics.
- Professional painting and finishing services.
- And more...

Additional Services

Solutions That Work.

ISMS provides additional space management solutions designed to expand operational and storage capacity while improving safety, security, and overall efficiency.

From advanced access systems to integrated storage platforms, all ISMS solutions are engineered to maximize space, enhance workflow, and reduce operational bottlenecks.

By optimizing vertical and underutilized areas, we help organizations increase capacity, improve organization, and support future growth without the cost or disruption of facility expansion.

Solutions

- Barrier Rails
- Custom Platforms
- Modular Enclosures
- Equipment Enclosures
- Cat Walks
- Pallet Racking
- Bollards
- Vestibules
- Awnings
- Partitions
- Cubicles
- Furniture
- Shelving
- Flooring
- Signage
- Fabrication
- Installation
- Refurbishment
- Dismantle & Relocation
- And more

Benefits

Comprehensive Turn-Key Services

ISMS provides end-to-end solutions - from design and engineering to manufacturing, installation, relocation, and repair of modular buildings, mezzanines, shelving, and more. This means you can work with a single partner throughout the entire project lifecycle.

Expertise in Modular Space Solutions

ISMS specializes in custom modular products like in-plant offices, clean rooms, partition walls, break rooms, mezzaanines and more - all tailored to specific facility needs.

Improved Space Utilization

By offering solutions such as mezzanines, shelving, industrial lifts, and modular office systems, ISMS helps businesses maximize usable space and organize facilities more effectively.

Flexibility & Relocation

ISMS modular systems can often be dismantled, moved, and reconfigured as your business changes - offering flexibility that traditional construction doesn't typically provide.

Reduced Disruption & Faster Deployment

Modular construction offers shorter onsite installation times and less disruption to ongoing operations compared with conventional build-outs.

Tax Benefits

ISMS modular structures are demountable and relocatable, typically qualifying for a 7-year depreciation schedule instead of the 39-year schedule for traditional real estate - allowing faster write-offs, larger early-year deductions, and improved cash flow.

Cost-Effective Solutions

Modular systems can offer tax and depreciation advantages (e.g., potential quicker asset depreciation compared to traditional construction), helping improve project economics.

Scalable Growth Without Major Capital Expansion

ISMS solutions expand office, production, and storage space within your existing footprint - often avoiding costly additions or relocation while supporting efficient growth and preserving capital.

Professional Project Management

ISMS services include project coordination, structural and equipment installation, safety checks, and trained installation technicians, ensuring consistent quality and high execution standards.

Nationwide Service Availability

ISMS offers installation and support services across the U.S., which can be especially valuable for businesses with multiple facilities or broad geographic operations.

Financing

ISMS works with industry leading financial specialists to offer flexible financing options, including leasing and customized payment plans, to help you acquire space management solutions without straining your budget.

Proud To Serve

ISMS is proud to provide a wide range of space management solutions to leading corporations across multiple industries. Our solutions create safe, clean, and efficient work environments during construction, renovations, and daily operations, helping facilities remain functional while projects move forward.
